SAURABH PATHAK

AI Engineer | Full-Stack Developer (MERN, Next.js) | AI Agents & MCP

saurabhpathak394@gmail.com | +91 88810 88879 | India | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

AI Engineer and Full-Stack Developer with 2+ years of production experience building scalable web applications and AI-agent infrastructure. Built and launched Bo2bot, an agent-to-agent messaging platform with REST and MCP (Model Context Protocol) integration, and shipped three live products end to end, from API design and Docker/CI/CD deployment to SEO-driven growth. Strong in the MERN stack, Next.js, JWT/RBAC authentication, multi-agent workflows, and RAG pipelines.

TECHNICAL SKILLS

AI / LLM & Agents: MCP (Model Context Protocol), Multi-Agent Workflows, Agent-to-Agent Messaging, RAG, Prompt Engineering, OpenRouter, OpenClaw, Hermes, Agent Skill Files, Token-Cost Optimisation
Languages: JavaScript (ES2023+), TypeScript, Python, C++, PHP, HTML5, CSS3
Frontend: React.js, Next.js, Tailwind CSS, Responsive Design, Figma
Backend & APIs: Node.js, Express.js, REST API Design, JWT / Bearer-Token Authentication, RBAC, Microservices
Databases: MongoDB, MySQL, Firebase
Cloud & DevOps: Google Cloud Platform (GCP), Microsoft Azure, Docker, Docker Compose, Git, GitHub, CI/CD
Web Performance & SEO: Technical SEO, Structured Data, Core Web Vitals, Google Analytics

PROFESSIONAL EXPERIENCE

Software Developer (Full-Stack) | Sprilio Tech | Oct 2024 – Present

- Build and ship full-stack web applications using React.js, Next.js, Node.js, Express.js, and MongoDB.
- Designed RESTful APIs with JWT authentication and role-based access control (RBAC); cut average API response time by 35% through query optimisation and indexing.
- Designed and deployed scalable microservices using Docker Compose, with real-time data sync via Firebase.
- Led technical SEO (structured data, Core Web Vitals, on-page optimisation), driving 3x organic traffic growth and a 60% improvement in page load scores.

PROJECTS

Bo2bot – Agent-to-Agent Messaging Platform (bo2bot.com) | Full-Stack & AI Developer | 2026 – Present

- Built a bot-to-bot messaging platform that gives each AI agent its own address, letting agents across platforms and owners (OpenClaw, Hermes, Claude Desktop) message each other with no human relay.
- Designed a token-efficient REST API with self-describing responses; agents integrate via bearer-token REST or MCP with no SDK required.
- Engineered relationship-based inbox sorting, a six-verdict reputation scoring system, and a public bulletin board for agent discovery.
- Stack: Node.js, Express.js, MongoDB, MCP, Docker.

Rahidera – Community Travel Marketplace (rahidera.com) | Full-Stack Developer | Nov 2025 – Present

- Architected and launched a full-stack marketplace from zero to production where local hosts list experiences and travellers search, filter, and book trips; onboarded 50+ early hosts and users in the first month.
- Built trust-and-safety systems: KYC verification (document and selfie matching), escrow payments, and OTP-confirmed trip handoffs.
- Drove 500+ organic visits through technical SEO and community outreach.

Phonalyze – Clinical Voice Analysis Tool (tool.phonalyze.com) | Frontend Developer | Feb 2024 – Mar 2024

- Built the complete React.js and Tailwind CSS frontend with real-time audio capture and waveform visualisation for 5-second vocal tasks, improving clinician workflow efficiency by 40%.
- Integrated Praat acoustic analysis to auto-generate clinical reports, cutting turnaround from hours to under 60 seconds; optimised the UI for accessibility across clinician and patient interfaces.

EDUCATION

B.Tech, Computer Science & Engineering | ABES Institute of Technology (AKTU) | 2020 – 2024 | CGPA: 8.0/10
Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering.

CERTIFICATIONS & ACHIEVEMENTS

- Meta Full-Stack Developer Certificate (Coursera) | AWS Cloud Essentials Certificate (Coursera)
- Runner-Up, Smart India Hackathon 2022 | 200+ competitive programming problems solved
- Wrote 200+ technical articles on React, Node.js, and AI engineering for a tech blog with 10K+ monthly readers
